# BCACACS 401

## Fourth Semester B.C.A. Degree Examination, June/July 2026
## (SEP) (2025 – 26 Batch Onwards)
## PYTHON PROGRAMMING

Time : 3 Hours Max. Marks : 80

***Note :*** *Answer **any ten** questions from Part – **A** and **one full** question from **each Units** in Part – **B**.*

PART – A **(10×2=20)**

1. a) How to write a comment line in Python ? Mention two types.
   b) List any four flavors of Python.
   c) Give syntax of if .. elif statement in Python.
   d) List any four type conversion functions in Python.
   e) Why are strings called immutable ?
   f) How are membership operators used in strings ?
   g) Differentiate List and Tuple.
   h) List any four file access modes in Python.
   i) What is Constructor ? How to define constructor in Python ?
   j) What is root window ? How is it created in Python?
   k) How is table created in SQLite database ? Give example.
   l) What is Data Visualization ? List the different types of charts created.

PART – B

**Unit – I**

2. a) Explain Arithmetic, Logical and Relational operators with examples.
   b) Explain while loop and for loop with syntax and example.
   c) Explain exception handling in python with try ... except.. finally block. **(5+5+5)**

P.T.O.

CANARA COLLEGE LIBRARY MANGALURU-3

CANARA COLLEGE LIBRARY MANGALURU-3

3. a) How do you read different types of input from the keyboard ? Give examples.
   b) Explain any five features of Python.
   c) Write a Python program to check for ValueError and ZeroDivisionError exceptions. **(5+5+5)**

## Unit – II

4. a) Explain indexing and slicing on strings with example.
   b) Explain any five Dictionary methods with syntax and their purpose.
   c) Explain indexing and slicing on list with example. **(4+5+6)**

5. a) What is a Set ? Explain any four set methods with example.
   b) Explain any five string methods with syntax and example.
   c) With example explain the basic operations performed on Tuple. **(5+5+5)**

## Unit – III

6. a) List and explain various file opening modes with examples.
   b) What is inheritance ? How to implement inheritance in Python ? Give example.
   c) With example explain following widgets.
      i) Label ii) Radiobutton. **(5+5+5)**

7. a) Explain different methods to read data from the file with example.
   b) Explain method overloading and overriding with example.
   c) Write a note on arranging widgets in a frame using layout managers. **(5+5+5)**

## Unit – IV

8. a) Explain the following methods to create DataFrame with example:
      i) using.CSV file ii) List of Tuples.
   b) Explain any five NumPy array attributes with syntax.
   c) Explain any five string processing methods supported by Pandas Library with examples. **(5+5+5)**

9. a) Explain different NumPy array creation functions with example.
   b) Explain different SQLite module methods required to use SQLite database.
   c) List and explain steps with example to create bar graph using matplot library module. **(5+5+5)**
